1-877-SYNGENTA (1-877-964-3682)

SECTION – 1: PRODUCT IDENTIFICATION

Product Identifier: DYNASTY® 100FS Fungicide
Registration Number: 28394 (Pest Control Products Act)
Chemical Class: A beta-methoxyacrylate fungicide

Active Ingredient (%): Azoxystrobin (9.6 %)
Chemical Name: methyl (αE)-2-[[6-(2-cyanophenoxy)-4-pyrimidinyl]oxy]-α-(methoxymethylene)benzeneacetate
Product Use: Broad-spectrum water-based seed treatment fungicide used to control various seed- and soil-borne diseases on registered crops. For further details please refer to product label.

SECTION – 2: COMPOSITION/INFORMATION ON INGREDIENTS

*** Syngenta Occupational Exposure Limit (OEL)
**** Recommended by AIHA (American Industrial Hygiene Association)
† Material listed in Ingredient Disclosure List under Hazardous Products Act.

Ingredients not precisely identified are proprietary or non-hazardous. Values are not product specifications.
Syngenta Hazard Category: B, S

SECTION – 3: HAZARDS IDENTIFICATION

 Symptoms of Acute Exposure
May cause eye irritation.

 Hazardous Decomposition Products
Can decompose at high temperatures forming toxic gases.

Physical Properties
Appearance: Opaque yellow liquid.
Odour: Paint-like.

Unusual Fire, Explosion and Reactivity Hazards
During a fire, irritating and possibly toxic gases may be generated by thermal decomposition or combustion. This product is a thick emulsion of oily and solid materials in water. It mixes with water to form a creamy emulsion.
Potential Health Effects

Relevant routes of exposure: Skin, eyes, mouth, lungs.

SECTION – 4: FIRST AID MEASURES

IF POISONING IS SUSPECTED, immediately contact the poison information centre, doctor or nearest hospital. Have the product container, label or Material Safety Data Sheet with you when calling Syngenta, a poison control center or doctor, or going for treatment. Tell the person contacted the complete product name, and the type and amount of exposure. Describe any symptoms and follow the advice given. Call the Syngenta Emergency Line [1-800-327-8633 (1-800-FASTMED)], for further information.

EYE CONTACT: Flush eyes with clean water, holding eyelids apart for a minimum of 15 - 20 minutes. Remove contact lenses, if present, after 5 minutes, then continue rinsing eye. Call Syngenta, a poison control center or doctor for treatment advice. Obtain medical attention immediately if irritation persists.

SKIN CONTACT: Immediately remove contaminated clothing and wash skin, hair and fingernails thoroughly with soap and water. Flush skin with plenty of water for 15-20 minutes. Call Syngenta, a poison control centre or doctor for treatment advice.

INHALATION: Move victim to fresh air. If not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call Syngenta, a poison control centre or doctor for treatment advice.

INGESTION: If swallowed, immediately contact Syngenta, a poison control centre, doctor or nearest hospital for treatment advice. Have person sip a glass of water if able to swallow. Do not give anything by mouth to an unconscious person. Do not induce vomiting unless directed by a physician or a poison control center. If spontaneous vomiting occurs, have victim lean forward with head down to avoid breathing in of vomitus, rinse mouth and administer water.

NOTES TO PHYSICIAN:
There is no specific antidote. Treat symptomatically.

MEDICAL CONDITIONS KNOWN TO BE AGGRAVATED:
None known.

SECTION – 5: FIRE FIGHTING MEASURES

Flash point and method: > 93.3 ºC
Upper and lower flammable (explosive) limits in air: Not applicable.
Auto-ignition temperature: 590 ± 22.8 ºC
Flammability: Not flammable.
Hazardous combustion products: During a fire, irritating and possibly toxic gases may be generated by thermal decomposition or combustion, including carbon monoxide and carbon dioxide.

Conditions under which flammability could occur: Keep fire exposed containers cool by spraying with water.
Extinguishing media: Use foam, carbon dioxide, dry powder, halon extinguishant or water fog or mist, (avoid use of water jet). Wear full protective clothing and self-contained breathing apparatus. Evacuate nonessential personnel from the area to prevent human exposure to fire, smoke, fumes or products of combustion. Prevent use of contaminated buildings, area, and equipment until decontaminated. Water runoff can cause environmental damage. Contain run-off water with, for example, temporary earth barriers.
Sensitivity to explosion by mechanical impact: None known.
Sensitivity to explosion by static discharge: None known.

SECTION – 6: ACCIDENTAL RELEASE MEASURES

Personal Precautions: Make sure all personnel involved in the spill cleanup follow good industrial hygiene practices. A small spill can be handled routinely. Use adequate ventilation and equipment and wear clothing as described in Section 8 and/or the product label.
**Procedures for dealing with release or spill:** Control the spill at its source. Contain the spill to prevent material from spreading or contaminating soil or from entering sewage and drainage systems or any body of water. Clean up spills immediately, observing precautions outlined in Sections 7 and 8. Pump or scoop large amounts of liquid into a disposable container. Absorb remaining liquid or smaller spills with clay, sand or vermiculite. Scoop or sweep up material and place into a disposal container. Wash area with detergent and water. Pick up wash liquid with additional absorbent and place into compatible disposal container. On soils, small amounts will naturally decompose. For large amounts skim off the upper contaminated layer and collect for disposal. Once all material is cleaned up and placed in a disposal container, seal container and arrange for disposal. Spillages or uncontrolled discharges into watercourses must be reported to the appropriate regulatory authority.

**SECTION – 7: HANDLING AND STORAGE**

**Handling practices:** KEEP OUT OF REACH OF CHILDREN. Prevent eating, drinking, tobacco use, and cosmetic application in areas where there is a potential for exposure to the material. Wear full protective clothing and equipment (see Section 8). Rinse gloves and remove protective equipment, and wash hands thoroughly with soap and water after handling or working with the product and before eating, using tobacco, drinking, applying cosmetics or using the toilet. Wash contaminated clothing separate from household laundry and before re-use. Keep containers closed when not in use. Keep product, wash or rinse water, and contaminated materials from access by animals, birds or unauthorized people.

**Appropriate storage practices/requirements:** Store in original container only in a well-ventilated, cool, dry, secure area. Protect from heat, sparks and flame. Do not expose sealed containers to temperatures above 40 °C. Keep separate from other products to prevent cross contamination. Rotate stock. Clean up spilled material immediately.

**National Fire Code classification:** Not required.

**SECTION – 8: EXPOSURE CONTROLS/PERSONAL PROTECTION**

**Applicable control measures, including engineering controls:** This product is intended for in commercial seed treatment operations. Ensure work areas have ventilation, containment, and procedures sufficient to maintain airborne levels below the TLV. Warehouses, production area, parking lots and waste holding facilities must have adequate containment to prevent environmental contamination. Provide separate shower and eating facilities.

**THE FOLLOWING RECOMMENDATIONS FOR EXPOSURE CONTROLS/PERSONAL PROTECTION ARE INTENDED FOR THE MANUFACTURE, FORMULATION, PACKAGING AND USE OF THIS PRODUCT.**

**CONSULT THE PRODUCT LABEL FOR COMMERCIAL APPLICATIONS AND/OR ON-FARM APPLICATIONS.**

**Personal protective equipment for each exposure route:**

**General:** Avoid breathing dust, vapours or aerosols. Avoid contact with eye, skin and clothing. Wash thoroughly after handling and before eating, drinking, applying cosmetics or handling tobacco.

**INGESTION:** Do not eat, drink, handle tobacco, or apply cosmetics in areas where there is a potential for exposure to this material. Always wash thoroughly after handling.

**EYES:** Where eye contact is likely, use chemical splash goggles. Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower.

**SKIN:** Where contact is likely, wear chemical-resistant gloves (such as nitrile or butyl), coveralls, socks and chemical-resistant footwear. For overhead exposure, wear chemical-resistant headgear.

**INHALATION:** A respirator is not normally required when handling this substance. Use effective engineering controls to comply with occupational exposure limits. In case of emergency spills, use a NIOSH approved respirator with any N, R, P or HE filter.

Use a self-contained breathing apparatus in cases of emergency spills, when exposure levels are unknown, or under any circumstances where air-purifying respirators may not provide adequate protection.

**SECTION – 9: PHYSICAL AND CHEMICAL PROPERTIES**

**Appearance:** Opaque yellow liquid.

**Formulation Type:** Flowable seed treatment.

**Odour:** Paint-like.
**PH:** 7.7 @ 25°C.

**Vapour pressure and reference temperature:** $8.25 \times 10^{-13}$ mmHg @ 20 °C (Azoxystrobin Technical).

**Vapour density:** Not available.

**Boiling point:** Not available.

**Melting point:** Not applicable.

**Freezing point:** -10 °C.

**Specific gravity or density:** 1.04 g/mL @ 20 °C.

**Evaporation Rate:** Not available.

**Water/oil partition coefficient:** log $K_{ow} = 2.5$ (Azoxystrobin Technical).

**Odour threshold:** Not available.

**Viscosity:** 400-700 mPas (or CPS) @ 25°C.

**Solubility in Water:** 6 mg/L @ 20 °C (Azoxystrobin Technical).

---

### SECTION – 10: STABILITY AND REACTIVITY

**Chemical stability:** Stable under normal use and storage conditions.

**Conditions to avoid:** None known.

**Incompatibility with other materials:** None known.

**Hazardous decomposition products:** Can decompose at high temperatures forming toxic gases.

**Hazardous polymerization:** Will not occur.

---

### SECTION – 11: TOXICOLOGICAL INFORMATION

**Acute toxicity/Irritation Studies (Finished Product):**

- **Ingestion:** Low Acute Toxicity
  - Oral (LD50 Rabbit): $> 2,000$ mg/kg body weight

- **Dermal:** Low Acute Toxicity
  - Dermal (LD50 Rabbit): $> 2,000$ mg/kg body weight

- **Inhalation:** Low Acute Toxicity
  - Inhalation (LC50 Rat): $> 5.98$ mg/L air - 4 hours

- **Eye Contact:** Mildly Irritating (Rabbit)

- **Skin Contact:** Practically Non-Irritating (Rabbit)

- **Skin Sensitization:** Not a Sensitizer (Guinea Pig)

**Reproductive/Developmental Effects**

- **Azoxystrobin:** Shows weak chromosomal damage in mammalian cells at cytotoxic levels. Negative in whole animal assays for chromosomal and DNA damage at high dosages ($\geq 2,000$ mg/kg). In rabbits, no effect was observed up to the highest dose level (500 mg/kg/day). In rats, developmental effects were seen only at maternally toxic doses (100 mg/kg/day).

**Chronic/Subchronic Toxicity Studies**

- **Azoxystrobin:** In a rat 90-day feeding study, liver toxicity was observed at 2,000 ppm. This was manifest as gross distension of the bile duct, increased numbers of lining cells and inflammation of the duct. No toxicologically significant effects were seen in repeat dose dog studies. Data reviews do not indicate any potential for endocrine disruption. There is no evidence of neurotoxicity in any of the studies conducted with azoxystrobin.

**Carcinogenicity**

- **Azoxystrobin:** No carcinogenic effects observed in rats or mice at doses up to the maximum tolerated dose.
Other Toxicity Information:
None.

Toxicity of Other Components
The acute toxicity test results reported in Section 11, above, for the finished product take into account any acute hazards related to the “other components” in the formulation.

Propylene Glycol
Reported to cause central nervous system depression (anesthesia, dizziness, confusion), headache and nausea. Chronic dietary exposure caused kidney and liver injury in experimental animals.

Other materials that show synergistic toxic effects together with the product: None known.

Target Organs
Active Ingredient
Azoxystrobin: Liver.

Inert Ingredients
Propylene Glycol CNS, kidney, liver.

SECTION – 12: ECOLOGICAL INFORMATION

Summary of Effects
The active ingredient, azoxystrobin, is practically nontoxic to insects and birds, but is moderately, to highly, toxic to fish and aquatic invertebrates.

Eco-Acute Toxicity
Azoxystrobin:
Green Algae 5-day EC50 120 ppb
Invertebrates (D. magna) 48-hour EC50 280 ppb
Fish (Rainbow Trout) 96-hour LC50 470 ppb
Birds (Mallard Duck) 14-day LD50 > 250 mg/kg body weight

Environmental Fate
Azoxystrobin has a low bioaccumulation potential, low to moderate mobility in soil, but is moderately persistent to persistent in soil or water. The dissipation half-life in soil is 14 - 62 days. The main route of degradation is by microbial degradation, hydrolysis, and formation of bound residues.

SECTION – 13: DISPOSAL CONSIDERATIONS

Waste disposal information: Do not reuse empty containers unless they are specifically designed to be re-used.. Empty container retains product residue. Triple rinse, or equivalent, empty container, return rinse water to dilution mixture, and dispose of dilution mixture as a hazardous waste if it cannot be disposed of by use according to label instructions. Dispose of empty containers in accordance with local regulations. Consult provincial environment ministry for advice on waste disposal. Industrial/commercial waste may be handled at licensed facilities only. Waste shipments must be securely packaged and properly labelled. Only licensed carriers may be used, and proper documents must accompany the shipment.

Shipping information such as shipping classification:
TRANSPORTATION OF DANGEROUS GOODS CLASSIFICATION - ROAD/RAIL
Not Regulated.
SECTION – 15: REGULATORY INFORMATION

WHMIS classification for product: Exempt

A statement that the MSDS has been prepared to meet WHMIS requirements, except for use of the 16 headings.

This MSDS has been prepared in accordance with WHMIS requirements, but the data are presented under 16 headings.

Other regulations; restrictions and prohibitions

Pest Control Products (PCP) Act Registration No.: 28394

SECTION – 16: OTHER INFORMATION

The information contained herein is offered only as a guide to the handling of this specific material and has been prepared in good faith by technically knowledgeable personnel. It is not intended to be all-inclusive and the manner and conditions of use and handling may involve other and additional considerations. No warranty of any kind is given or implied and Syngenta will not be liable for any damages, losses, injuries or consequential damages which may result from the use of or reliance on any information contained herein. This Material Safety Data Sheet is valid for three years. This product is under the jurisdiction of the Pest Control Products Act and is exempt from the requirements for a WHMIS compliant MSDS. Hazardous properties of all ingredients have been considered in the preparation of this MSDS. Read the entire MSDS for the complete hazard evaluation of this product.
